About This Game

Being a developer for games is difficult. It's even harder when you are an indie developer. In Dev Guy, you play the roll of Warren (an independent developer) just trying to get his game on the app store before his game license expires. It sounds simple, but becomes complex quickly when his car goes missing, and his data disappears with it. Will warren get his car back? Join Warren as he tries to retrieve his game data while solving puzzles, hacking other developer's computers, breaking windows, and yelling at his friend Cabe. If you've played classic puzzle adventure games and feel the need for more, this game might be right up your alley. Using the power of the UDK, Dev Guy brings you the most graphically underwhelming game of this year.

Title: Dev Guy
Genre: Adventure, Free to Play, Indie
Developer:
Daniel Jonathan Bourke
Publisher:
Project tranquil
Release Date: 20 May, 2015

a09c17d780

English

The Land of Crystalis

* 寻找“未来”

For people who actually read reviews and want to try this game. You need to take a deep breath and start this game on insane difficulty. If you are doing the old "First I am gonna play on normal" then do not play this game. I started on Insane difficulty and died a lot but the satisfaction of actually being able to completely finish almost every level on insane difficulty when just starting the game is pure euphoria. Everytime you defeat a bunch of these robots, saying the phrase "Hunk of Junk" feels all that sweeter (There should have been an achievement for this. Why they did not even think of making this an achievement is the devs fault). 10/10, I am gonna start EX mode to start my revenge.. Pretty good and spooky for an mlp fan game and can be confusing at times but never the less do give this one a shot.. If you ever feel like picking up some older MMORPG, 9Dragons is a great choice. I pretty much like everything in this game and I don't mind grinding for hours. Maybe it's kinda hard to grasp everything as new user, but it's worth the effort. Like in many from this genre, this game is probably past it's prime time, and you won't be able to reach "top" easily, but it's still fun on low-mid range levels.. Sakura Sadist follows the story of Azusa, an energetic grrl who doesn't care about her school work. Her Best friend Mari helps her with everything from breakfast to schoolwork yet Azusa likes the campus queen Mamiko. Watch this yuri/ecchi story unfold based on your decision making. I recommend playing it with the patch which uncensores the games which gives you a lot more plot and "plot".. I only brought this dlc because of the celica, as the rest of the pack doesn't interest me one bit, as we have many "serious" race cars in the game now.

But thankfully at least kunos gave us one fun car to throw about on road tracks.
And ohh my, the celica is great fun, feels brilliant on the transfagarasan north hill climb!.

I personally wouldn't recommend this dlc just because with what I said on the first sentence. BUT as it works and looks good I can't give a bad review :).

Please kunos give us another japanese car pack or a hot hatch car pack or etc, just something fun!. I know you dislike people's opinions, but people will love it honestly!.. This was hard and made me feel dumb followed by genius every level until I finished it.. a♥♥♥♥♥pubg update, 2/10. The only (not terrible) authentic ATC game on Steam, very addicting, bright future, simple design - only 3.99\$.

Buy it.. before cup head was q/yo.

wacky graphics, amazing game play and a good variety of enemies make this game THE ONE SHOOT THEM UP TO PLAY.
highly recommended.

Excellent game, sadly suffers with poor ai. However it is fun no the less.. Hell of a game for 1 dollar. That's all I got to say about that.. A few interesting levels. A lot more boring ones.. \ud2b9\uc774\u558\uace0 \uace0\u720\u55c '\uc0bc\uac01\u615' \uc544\uc774\b514\u5b4\b85c \ub9cc\b4e4\u5c8\uace0, \ud3f4\b9ac\u2f1\b3c4 \ub098\b984\b300\b85c \ub41c \uc0c1\u0dc\u5d0\b2e4, \uc0ac\b78c\b4e4\uc774 '\uc778\b514 \uac8c\u784'\uc774\b77c\uace0 \uc778\u2dd\u560\b9cc\u55c \ub531 \uadf8\b7f0 \ud615\u0dc\u758 \uac8c\u784\uae30\b3c4 \ud55c\b370, \uc548\u314\b9b4\b9cc \ud558\b2e4.. probably the best idea out there...quite original and really fun and addictive!. Actually there is a way to play this game with ZDoom it just needs a lot of work beforehand.. Got it on Sale, Should have left it on sale.

Like the idea and can see why most people like it.
It has a lot of challenge and skill needed to play.

But for me it is to much of a crazy clickfest of chaos.

If you looking for something cute wwII themed and relaxing well this sure as hell is not what you want.

. I wish there was a faster walking/sprint option.

- I wish I could turn the intro subtitles off.

- I wish the voice acting was better.

- I wish there was an option in between the "heavy" and "low" *tape* effects.

- I wish the jumpscare/sounds were better.

- I wish there was some kind of notification if you got to a checkpoint or saving spot.

- I wish the death scene(s) of your character were better than a fading-to-black screen.

- I wish you could change the resolution in-game so I didn't have to restart it to make sure it worked right.. i love how you can have pets makes game even more fun

each pet dose diffrent task

so it helps out. The soundtrack is dank.

Also less Russian bias than War Thunder so like, that's a perk.

Spurdo Spärde, much love for the Finnish teams who bring games like this to life.
