## About This Software

### Learn Power Chords, Riffs and Rock Techniques for Rhythm and Lead Guitar

Charles McCrone, graduate of the Guitar Institute of Technology (famous training ground for rock guitarists), delivers over 100 lessons giving a complete overview of rock technique and gear. Learn rock basics like power chords and riffs, plus some lead necessities like the blues scale and string bends. You'll also learn about distortion, chorus, and other popular guitar effects pedals. The Animated Fretboard shows a real-time display of guitar riffs, string bends, and guitar tricks which are hard to see in simpler, video-only guitar lessons. eMedia Instant Feedback technology highlights correctly played notes, which makes learning faster and easier. Classic guitar songs by artists like The Kinks, Green Day, Blue Öyster Cult, Nirvana, and others make guitar practice fun as you master rock, punk, and metal guitar styles.

### Features Include

- More than 50 videos with split-screen view and close-ups of both hands, lets you easily see the techniques used in the lessons.
- Rhythm guitar lessons with open chords, power chords (both open and moveable), palm muting, and other techniques.
- Instant Feedback that highlights notes in songs and riffs as they are played correctly (requires computer microphone).
- Lead guitar techniques such as string bends, vibrato, and hammer-ons, plus major, minor, and blues scales.

- 
- eMedia's Animated Fretboard to easily see guitar fingerings for chords, guitar riffs, and guitar scales.
  - Integrated guitar software tools, including an automatic guitar tuner, chord chart/dictionary, fingering charts, and metronome.
  - Over 40 Jam Tracks with slow and fast versions and a backing band to make learning fun. Learn the blues scale, and then practice guitar riffs or lead guitar with a band!
  - Hit guitar songs like "Paranoid" (Black Sabbath), "You Really Got Me" (Van Halen/ The Kinks), "Lake of Fire" (Nirvana), "Don't Fear the Reaper" (Blue Öyster Cult), "Tomorrow" (Silverchair), "All Right Now" (Free), and more!
  - Guitar lessons and songs as both audio and MIDI tracks where selections can be looped, slowed down, or sped up.

>Born  
>Mother ditches me in town center  
>Cry for help  
>Great Uncle comes to my rescue with berries  
>Uncle picks me up, smiling down upon me  
>Me, "dad?"  
>He carries me through town, i take in the sights and people  
>Reach the outskirts of town  
>He sets me down with that same comforting smile, and feeds me another berry  
>Uncle reaches in backpack  
>Me, "mmmm more berries"  
>Uncles smile fades as he pulls out a knife  
>We both know what must be done  
>Uncle, "shhhhhhhh....sleep now"  
>Die a slow death while Uncle mourns the loss of family and potential

11/10 would be begrudgingly euthanized by my Great Uncle for the well being of the town again. I wanted to like this game. I really did. Sadly I can not recommend this to anyone. The art work is nice .... but the blur as you move made me want to get sick. Horrid fighting mechanics paired with the annoying sounds and almost non existint storyline made me get buyers remorse within 5 mins. Just watch a youtube vid of the game and push down a mouse button and hold for an hour....It's Exactly as if you were playing. "It's a trap!" save your money. your welcome.. My favourite horror game, can't wait for the sequel on Halloween. Also this is one of the horror games that really scare me. John Kolbek and Nathan Sanders did a really good job on this. I definatly recommend this.. It's a great game and there's no doubt about that, everything about it feels nice, the soundtrack,the visuals... Everything! Would recommend it 10/10.. rep Love the changes they have made to this game, the game is some much more intense now and I love being able to execute somebody after you down them. Gives players much more risk to survive if the hunter can kill them once they go down. Really fun to play and I recommend it for everyone to try it

It only costs 99 cents. If you are reading this review just buy this game, because the meme factor alone is worth 99 cents.. This is a good turn based combat game , Grapics and playablity are very good for the price of this game. If you like the good old classics like X-Com , Fallout Tactics and the UFO games then this is another game you want to add to you collection.. Game is actually kind of hard as level increases. Only pet peeve is that we can't get it to work when not connected to WIFI or at least thats what we think the problem is. It will allow you to go to level select but will not start the game. Did anyone else run into this issue?. The VR aspect of this game is a novelty and reasonably fun until you realise the game is not actually good.

Most of the content is arbitrarily locked and although you can customise your ship loadouts, you're forced to unlock the weapons for them, not to mention the ship classes. Thus in the campaign mode (once unlocked) you are unable to build carriers or battleships until your user account reaches the requisite level.

The game itself is frustratingly buggy - upon loading a campaign whole fleets have disappeared, battles stop working after playing one and the save and exit feature appears to do nothing and you're forced to close the game in order to return to the menu.

The 3D models of ships are fixed for each class - there is no differentiation between nations or any hint of any actual ship classes. There really isn't any depth to the game, which isn't necessarily a bad thing for a casual game but the repeated bugs and content-locking thinned my patience far more quickly than I would have liked.. One of the most hidden-est gems I've ever come across. It was included in a pack of 10 free games for like \$2, I did not expect anything half as good as this. It's Warcraft 3 meets Battle For Middle Earth meets Total War. Controllable heroes, epic fantasy armies, but slightly limited by technology to be majorly epic...but you still get the feel of controlling a massive army.

I HIGHLY recommend this game. It's not very long, but it is a ton of fun. \$15 might be a lot so it depends how you look at it. I see it as a 2 hour movie costs about \$15. For the same price I got 20 hours of entertainment. In that sense it is absolutely worth it. If you don't like spending more than \$10 on a game (very understandable) I'd wait for a sale...but definitely pick it up on sale, as long as you're into this sort of genre, you won't be disappointed.. i like this game but a can't take the time to play it anymore :-(. Thanks for bringing windows land random freezes, and game crashing to my otherwise flawless Linux installation. Good set. You might get some looks and questions from other players. Generally the newer ones, asking if you do competitions, as you look as though you have sponsors.

To give some perspective on in-game "closest to"equivalent items and requirements: T=Tackle\VL=Line

SportFishing (T4) Cap: There are no in-game purchaseable caps\hats. So this is a bonus.

SportFishing (T12\VL3) Jacket: At Level 14 you can purchase a T10\VL3 vest, and at Level 20 a T15\VL2

SportFishing 5 Rod Case: At level 12 you can get a 3 rod case, and at level 18 a 7 rod case.

(note the 7 rod case is 150 baitcoins)

SportFishing (T50\VL7) BackPack: You wont get this kind of capacity until you get to level 26, even then its going to cost you 75 baitcoins. It's a T50\VL5 plus 3 rods. I played it alot - even the predecessor space tripper. I think it is a difficult but entertaining game. It is sure worth 5€ if you like old - school top down shooters. You cant learn the steering properly in under 2 hours - no need to pay attention to reviews with a playtimetime below that.
